

Green Certification - The Custom Boxes Co.

This document outlines DataWax's sustainable packaging certifications. Packaging is necessary to protect products while in transit and communicate key information. DW's goal is to minimise the environmental footprint of packaging while ensuring the packaging is effective in serving its purpose.

Designed to Reduce Material Use

- Minimises material usage and eliminates use of plastic in packaging.
- Good package-to-product ratio and carton efficiency.
- Inner tray made from 100% recycled Kraft material.
- Outer sleeve made from 80% recycled material.

Designed for Reuse

- Designed for reuse as a storage tray to keep wax clean.
- Use of durable materials which are required for effective reuse.
- Reusable packaging is compatible with existing infrastructure.

Designed for Recyclability

- 100% recyclable
- Packaging compatible with recycling systems used worldwide.
- Use of single materials with clearly identifiable recyclable logos to increase recyclability.
- Packaging avoids films, wet-strength additives, foil stamps, metallic inks, grommets and other materials that reduce recyclability.

Sustainable Paper and Paperboard

- Certified FSC® paper and cardboard, responsibly sourced, unbleached and acid-free.
- Sustainable Green Printing.
